GRAIN NUTRITION, TAILORED TO YOU
POWERED BY GRAINCARE TECHNOLOGY

Preserving the grain's natural form,
and the nutrition inherent to the grain.

Through research focused on minimal processing,
we preserve both the original structure
and nutritional value of whole grains.

From hard-to-eat grains to grains that are easy to eat

Grain-Care™ Technology

Personalized mixed-grain compositions with automated individual recommendation
and methods for manufacturing the same

Patent No. 10-2025-0083072
International Patent Classification: G16H 20/60
Priority examination in progress

Grain-Care™ Technology

A technology that analyzes the physical properties
and characteristics of each grain,
applies optimal soaking times
and multiple high-temperature, high-pressure cooking processes,
preserves the grain's original form,
and enables room-temperature storage without preservatives.

Grain TokTok

Between the high meal satisfaction of whole grains and the convenient consumption of protein shakes

Existing meal replacements force a choice: filling but inconvenient, or convenient but insufficient. GOKMUL:ONE eliminates that trade-off — combining the satisfaction of a real, chewable meal with the ease of immediate consumption.

A new category of grain-based food that delivers both nutrition and convenience.

Three Simple Steps to Enjoy Grain-Toktok

1. Choose

Pick the Grain-Toktok that fits your diet.

2. Add

Open and add
no cooking needed.

3. Mix

Blend it into your meal,
your way.

As a Meal

A complete and nourishing meal
on its own, no rice required.

With Meals

Easy to add to any dish,
anytime, anywhere.

As a Snack

A light, satisfying option
when you need quick nutrition.
